

Helix Dynamics Information Security Policy

1. Passwords and MFA

Passwords must be at least 14 characters long. Multi-factor authentication is mandatory for email, VPN, source control and all cloud consoles. Passwords must be stored in the company password manager and never shared.

2. Data Classification

Company data is classified as Public, Internal, Confidential or Restricted. Customer data and employee salary data are Restricted and may only be stored in approved systems with encryption at rest.

3. Device Security

Laptops must use full-disk encryption and lock automatically after 5 minutes of inactivity. Operating system security updates must be installed within 14 days of release.

4. Incident Reporting

Suspected security incidents, including lost devices and phishing emails, must be reported to the Security team within 1 hour of discovery through the #security-incidents channel or security@helixdynamics.example.

5. Access Reviews

Managers review access to production systems every quarter. Access is removed within 24 hours of an employee leaving the company.

6. Security Training

All employees must complete security awareness training within 30 days of joining and annually thereafter. Engineers must also complete secure coding training every year.
